

eurocell[®]

surface treatment

standard types:

uncoated

*totally neutral,
slightly absorbing*
preferable in faster reacting systems
dry mixtures of mortars, putties,
or similar

„-H“

much hydrophob, applicable up to 300°C
for waterbased systems, e.g. ready mixed wet putties,
colour systems, plaster, and further
resin systems as SMC, BMC, GFK, Epoxy and Phenol,
Polyuretane, e.g.

„-23“

*medium hydrophob, intensive contact with surface layer
as alternative to the above mentiened „-H“-types*

Beside these standard treatments the most different coatings can be applied on request.
We have different types an stock for sampling.

(The coating-number is attached ty the type of **eurocell**[®], e.g. 145-H, 150, 300-23)
