

# eurocell<sup>®</sup>

## surface treatment

### standard types:

#### uncoated

*totaly neutral,  
slightly absorbing*  
preferable in faster reacting systems  
dry mixtures of mortars, putties,  
or similar

#### „-H“

*much hydrophob, applicable up to 300°C*  
for waterbased systems, e.g. ready mixed wet putties,  
colour systems, plaster, and further  
resin systems as SMC, BMC, GFK, Epoxy and Phenol,  
Polyuretane, e.g.

#### „-23“

*medium hydrophob, intensive contact with surface layer  
as alternative to the above mentiened „-H“-types*

Beside these standard treatments the most different coatings can be applied on request.  
We have different types an stock for sampling.

(The coating-number is attached ty the type of **eurocell**<sup>®</sup>, e.g. 145-H, 150, 300-23)
