

# Agroperl®-G (coarse)

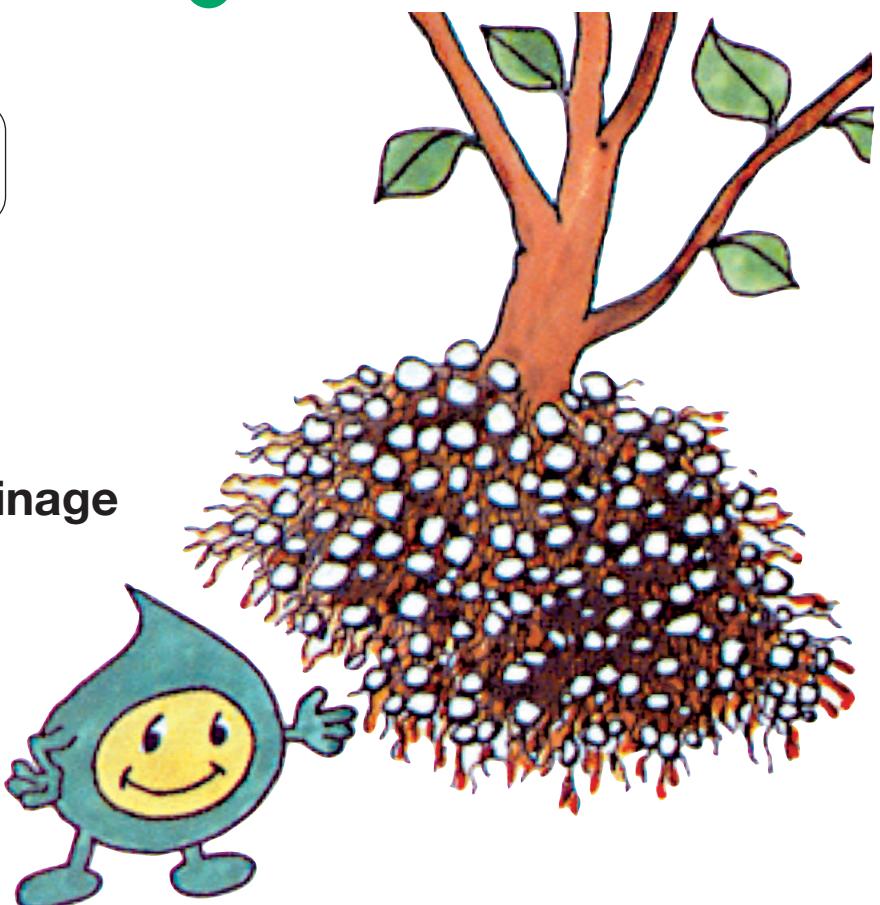

(neutral **Agrar-euoperl® Type K1:** for water storage and drainage)

- 1 optimizes air-water ratio
- 2 moistens and aerates
- 3 reduces transplant shock
- 4 natural long-term soil improvement material
- 5 ecologically-friendly and healthy
- 6 long-lasting, pest-resistant

**granular natural product:**  
**no fibers , no chemicals**

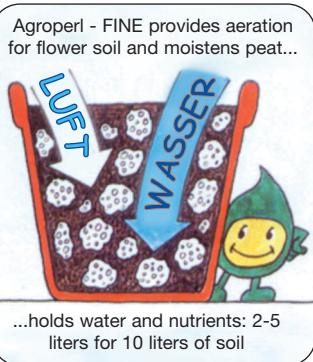

## especially for:

- ✓ **heavy soils**
- ✓ **storage and drainage layers**
- ✓ **wet climates**

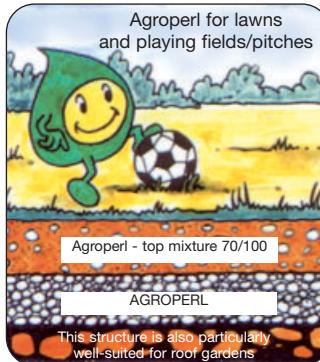

**Agroperl®** is open-pore volcanic rock: designed as a **physical** soil enhancer and **neutral** growing medium for creating an **optimal soil climate**.

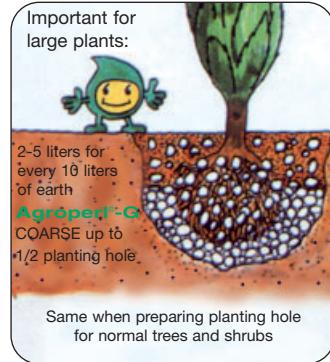

### Pots and Containers

### Lawns and Roof Gardens

### Planting Holes

**promotes growth**  
through proper  
**air: water ratio**

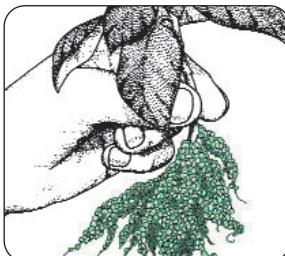

**drains**  
and  
**stores**

**Agroperl®-G**  
is especially suited for  
**heavy soils**

## Using Agroperl®-G

Especially suited for **aeration** and **drainage** (along with storage), such as with heavy or wet soils, hard-stem bushes, plants with large air requirements (see **Agroperl®-F** for opposite requirements)

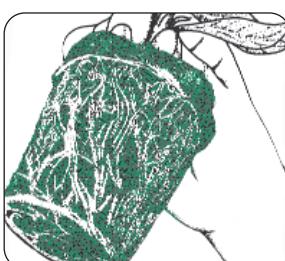

### Rooting

Ideal promotion of fine-root growth with  
**spray mist propagation**  
**propagation beds**  
**and houses**  
 pure (100 % **Agroperl®-G** by vol.)  
 or mixed with soil, peat etc.  
 (50 - 80 % **Agroperl®-G** by vol.)

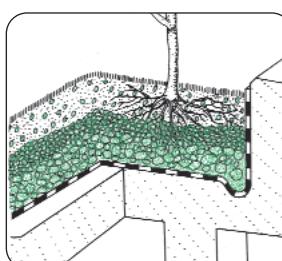

### Soil Enhancement

**outdoor areas:** for **medium** soils  
 for **heavy** soils  
 prior to **planting**  
 when **resodding** **playing fields/pitches**  
**residential lawns**  
**golf courses**  
 work in **30 - 80 l/m²/10 - 20 cm**  
 or mix with soil, peat, etc.  
**30 - 80 % Agroperl®-G** by vol.

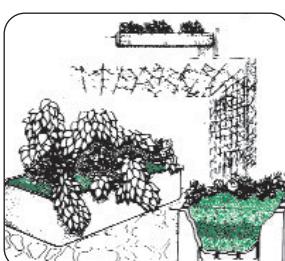

### Substrates, Plant Soils

for plants with increased air need and sensitivity to standing water, such as orchids, cacti, ferns, and bonsais  
**30 - 80 % Agroperl®-G** by vol.

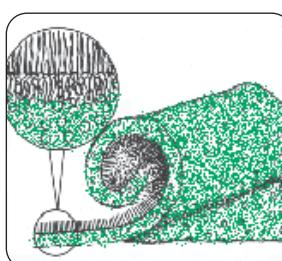

### Roof Gardens Substrates and Overlays

Optimizes: **water storage**  
**drainage**  
**weight reduction**  
**insulation**  
**30 - 70 % Agroperl®-G** by vol.  
 Optionally under filter liner  
**5 - 20 cm** pure **Agroperl®-G**  
 as storage and drainage layer.

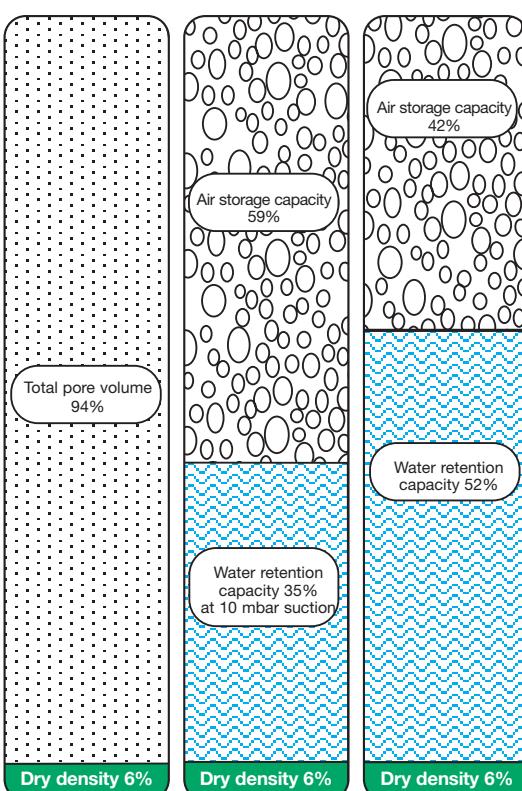

### Planters, Tub Plants

provides: **low weight,**  
**good growth**  
 prevents: loss of substrate.  
 Use **30 - 80 %** by vol.  
**Agroperl®-G** in the plant substrate. Storage and drainage layer (approx 1/3 of height) of pure **Agroperl®-G** optional.

### Lawns and Turf

increases air volume and water storage:  
**healthier, more secure lawn**  
**increased life**  
**low maintenance costs**  
 Soil preparation:  
 work in **30 - 80 l/m²/10 - 20 cm** for lawn base and top dressing, mixed with soil, peat, etc. **20 - 70 % Agroperl®-G** by vol.

**Note:** Moisten well when using (30-40 l / bag).

When wetting, keep greater water retention capacity in mind.

\* Infiltration rate may be affected by de-mixing or introduction of mud.

### Technical Data

Infiltration rate:	high (60-90 cm/h) *
Water storage:	approx. 52 % by vol.
Water retention capacity:	approx. 35 % by vol. (at 10 mbar suction)
Air storage capacity:	approx. 59 % by vol.
Total pore volume:	approx. 94 % by vol.
Dry density:	approx. 6 % by vol. = approx. 90 kg/m³
Weight wet (saturated):	approx. 52 % by vol. = approx. 600 kg/m³
Organic material:	0 % by vol.
pH-range:	neutral
Stability:	non-decaying, stable form
Sterilization:	<b>Agroperl®</b> is completely clean and sterile when delivered. (Can be sterilized with flame, chemicals, or steam for re-use.)
Temperature resistance:	up to 800 °C, brief periods up to 1200 °C
Conductance:	approx. 0,23 mS cm⁻¹
Grain size:	≤ 6 mm

Labeling per Düngemittelverordnung [Fertilizer Act] BGBI Nr. 1007/94:

Distributor: Stauss-Perlite GmbH, A-3100 St. Pölten, Stifterstr. 4

Country of origin: Austria; Trade name: Agroperl

Designation: soil enhancer

Original material: 100 % mineral from cellularly expanded volcanic rock, intentionally capillary for agricultural use.

Intended uses: see "Uses"

Weight or volume: see "Technical Data"
